## Product datasheet: Space heater to Regulation (EU) No 811/2013 (S.I. 2019 No. 539 / Programme 2)

Manufacturer  Space heating energy efficiency class under average climate conditions, medium-temperature applications  Energy efficiency class, space heating under average climate conditions, low-temperature applications  Rated heating output under average climate conditions for medium-temperature applications (P rated)  Rated heating output under average climate conditions for low-temperature applications (P rated)  Rated heating output under average climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under average climate conditions for medium-temperature applications (R)s)  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (R)s)  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (R)s)  Annual energy consumption under average climate conditions for medium-temperature applications (OHE)  Annual energy consumption under average climate conditions for low-temperature applications (OHE)  Annual energy consumption under average climate conditions for low-temperature applications (OHE)  Annual energy consumption under average climate conditions for low-temperature applications (OHE)  Sound power level, indoor  Option for operation only at off-peak times  For all special measures to be taken during assembly, installation or maintenance of the roomal heater, see the installation instruction with the properature applications (P rated)  Rated heating output under colder climate conditions for medium-temperature applications (P rated)  Rated heating output under colder climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency	WPL 24 A Set		
Space heating energy efficiency class under average climate conditions, medium-temperature applications  Attending output under average climate conditions for medium-temperature applications  Attending output under average climate conditions for low-temperature applications (P rated)  Rated heating output under average climate conditions for low-temperature applications (P rated)  Rated heating output under average climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under average climate conditions for medium-temperature applications (Ps)  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (Ns)  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (Ns)  Annual energy consumption under average climate conditions for medium-temperature applications (QHE)  Annual energy consumption under average climate conditions for low-temperature applications (QHE)  Sound power level, indoor  Option for operation only at off-peak times  For all special measures to be taken during assembly, installation or maintenance of the rook heater, see the installation instruction with temperature applications (P rated)  Rated heating output under colder climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for medium-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P rated)	236413		
Energy efficiency class, space heating under average climate conditions, low-temperature applications  Rated heating output under average climate conditions for medium-temperature applications (P rated)  Rated heating output under average climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under average climate conditions for medium-temperature applications ((Is))  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications ((Is))  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (QHE)  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (QHE)  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (QHE)  Annual energy consumption under average climate conditions for low-temperature applications (QHE)  Sound power level, indoor  Option for operation only at off-peak times  For all special measures to be taken during assembly, installation or maintenance of the rook leater, see the installation instruction with temperature applications (P rated)  Rated heating output under colder climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (R) as a color climate conditions for low-temperature applications (R) as a color clima	STIEBEL ELTRON		Manufacturer
Nated heating output under average climate conditions for medium- temperature applications (P rated)  Rated heating output under average climate conditions for low- temperature applications (P rated)  Seasonal space heating energy efficiency under average climate conditions for medium-temperature applications (f)s)  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (f)s)  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (f)s)  Annual energy consumption under average climate conditions for medium-temperature applications (OHE)  Annual energy consumption under average climate conditions for low- temperature applications (OHE)  Annual energy consumption under average climate conditions for low- temperature applications (OHE)  Sound power level, indoor  Option for operation only at off-peak times  For all special measures to be taken during assembly, installation or maintenance of the root heater, see the installation instruction assembly, installation or maintenance of the root heater, see the installation instruction with temperature applications (P rated)  Rated heating output under colder climate conditions for low- temperature applications (P rated)  Rated heating output under warmer climate conditions for medium- temperature applications (P rated)  Rated heating output under warmer climate conditions for medium- temperature applications (P rated)  Rated heating output under warmer climate conditions for low- temperature applications (P rated)  Rated heating output under warmer climate conditions for low- temperature applications (P rated)  Rated heating output under warmer climate conditions for low- temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P)s	A++		
Rated heating output under average climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under average climate conditions for medium-temperature applications (Ips)  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (Ips)  Annual energy consumption under average climate conditions for medium-temperature applications (Ips)  Annual energy consumption under average climate conditions for medium-temperature applications (QHE)  Annual energy consumption under average climate conditions for low-temperature applications (QHE)  Sound power level, indoor  Option for operation only at off-peak times  For all special measures to be taken during assembly, installation or maintenance of the rook heater, see the installation instruction with temperature applications (P rated)  Rated heating output under colder climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P rated)	A+++		
Seasonal space heating energy efficiency under average climate conditions for medium-temperature applications (ηs)  Seasonal space heating energy efficiency under average climate conditions for medium-temperature applications (ηs)  Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (ηs)  Annual energy consumption under average climate conditions for medium-temperature applications (QHE)  Annual energy consumption under average climate conditions for low-temperature applications (QHE)  Annual energy consumption under average climate conditions for low-temperature applications (QHE)  Sound power level, indoor  Option for operation only at off-peak times  For all special measures to be taken during assembly, installation or maintenance of the room heater, see the installation instruction heater, see the installation instruction with the perature applications (P rated)  Rated heating output under colder climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for medium-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P sated)	16	kW	
Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (ηs)  Annual energy consumption under average climate conditions for medium-temperature applications (QHE)  Annual energy consumption under average climate conditions for low-temperature applications (QHE)  Annual energy consumption under average climate conditions for low-temperature applications (QHE)  Sound power level, indoor  Option for operation only at off-peak times  For all special measures to be taken during assembly, installation or maintenance of the room heater, see the installation instruction with temperature applications (P rated)  Rated heating output under colder climate conditions for low-temperature applications (P rated)  Rated heating output under colder climate conditions for medium-temperature applications (P rated)  Rated heating output under warmer climate conditions for medium-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P) sasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P) sasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P) sasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P) sasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P) sasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P) sasonal space heating energy efficiency under colder climate conditions for medium-temperature energy efficiency under cold	16	kW	
conditions for low-temperature applications (ηs)       /6         Annual energy consumption under average climate conditions for medium-temperature applications (QHE)       kWh/a       94'         Annual energy consumption under average climate conditions for low-temperature applications (QHE)       kWh/a       726         Sound power level, indoor       dB(A)       5         Option for operation only at off-peak times       For all special measures to be taken during assembly, installation or maintenance of the room heater, see the installation instruction.         Rated heating output under colder climate conditions for medium-temperature applications (P rated)       kW       3         Rated heating output under colder climate conditions for medium-temperature applications (P rated)       kW       3         Rated heating output under warmer climate conditions for medium-temperature applications (P rated)       kW       3         Rated heating output under warmer climate conditions for low-temperature applications (P rated)       kW       3         Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P) rated)       %       12         Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P) seasonal space heating energy efficiency under colder climate       %       12	138	%	
medium-temperature applications (QHE)  Annual energy consumption under average climate conditions for low-temperature applications (QHE)  Sound power level, indoor  Option for operation only at off-peak times  For all special measures to be taken during assembly, installation or maintenance of the room heater, see the installation instruction instruction with temperature applications (P rated)  Rated heating output under colder climate conditions for medium-temperature applications (P rated)  Rated heating output under colder climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for medium-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (P sated)  Seasonal space heating energy efficiency under colder climate	175	%	
temperature applications (QHE)  Sound power level, indoor  Option for operation only at off-peak times  For all special measures to be taken during assembly, installation or maintenance of the room heater, see the installation instruction heater, see the installation instruction heater, see the installation instruction with temperature applications (P rated)  Rated heating output under colder climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for medium-temperature applications (P rated)  Rated heating output under warmer climate conditions for medium-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (¶s)	9475	kWh/a	
Option for operation only at off-peak times  For all special measures to be taken during assembly, installation or maintenance of the room heater, see the installation instruction heater, see the installation or maintenance of the room heater, see the installation instruction heater se	7284	kWh/a	
Special measures  For all special measures to be taken during assembly, installation or maintenance of the room heater, see the installation instruction with temperature applications (P rated)  Rated heating output under colder climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for medium-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (ηs)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (ηs)	54	dB(A)	Sound power level, indoor
Special measures  Rated heating output under colder climate conditions for medium-temperature applications (P rated)  Rated heating output under colder climate conditions for low-temperature applications (P rated)  Rated heating output under colder climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for medium-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (ηs)  Seasonal space heating energy efficiency under colder climate	-		Option for operation only at off-peak times
temperature applications (P rated)  Rated heating output under colder climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for medium-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (ηs)  Seasonal space heating energy efficiency under colder climate	For all special measures to be taken during assembly, installation or maintenance of the room heater, see the installation instructions		Special measures
Rated heating output under warmer climate conditions for medium-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (ηs)  Seasonal space heating energy efficiency under colder climate	19	kW	
Rated heating output under warmer climate conditions for low-temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (ηs)  Seasonal space heating energy efficiency under colder climate	23	kW	<b>9</b> ,
Temperature applications (P rated)  Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (ηs)  Seasonal space heating energy efficiency under colder climate	10	kW	
conditions for medium-temperature applications (ηs)  Seasonal space heating energy efficiency under colder climate	8	kW	
Seasonal space heating energy efficiency under colder climate	127	%	
conditions for low-temperature applications ( $\eta$ s)	138	%	Seasonal space heating energy efficiency under colder climate conditions for low-temperature applications ( $\eta$ s)
Seasonal space heating energy efficiency under warmer climate % conditions for medium-temperature applications (ηs)	157	%	
Seasonal space heating energy efficiency under warmer climate % conditions for low-temperature applications ( $\eta$ s)	194	%	
Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) kWh/a	14103	kWh/a	
Annual energy consumption under colder climate conditions for low-temperature applications (QHE) kWh/a	16033	kWh/a	
Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) kWh/a	3373	kWh/a	•
Annual energy consumption under warmer climate conditions for low-temperature applications (QHE) kWh/a	2174	kWh/a	•
Sound power level, outdoor dB(A)	46	dB(A)	Sound power level, outdoor
