

Product datasheet: Space heater to Regulation (EU) No 811/2013 (S.I. 2019 No. 539 / Programme 2)

		TTF 35
		190365
Manufacturer		tecalor
Space heating energy efficiency class under average climate conditions, medium-temperature applications		A++
Energy efficiency class, space heating under average climate conditions, low-temperature applications		A+++
Rated heating output under average climate conditions for medium-temperature applications (P rated)	kW	34
Rated heating output under average climate conditions for low-temperature applications (P rated)	kW	38
Seasonal space heating energy efficiency under average climate conditions for medium-temperature applications (η s)	%	133
Seasonal space heating energy efficiency under average climate conditions for low-temperature applications (η s)	%	200
Annual energy consumption under average climate conditions for medium-temperature applications (QHE)	kWh/a	20029
Annual energy consumption under average climate conditions for low-temperature applications (QHE)	kWh/a	15136
Sound power level, indoor	dB(A)	60
Rated heating output under colder climate conditions for medium-temperature applications (P rated)	kW	43
Rated heating output under colder climate conditions for low-temperature applications (P rated)	kW	47
Rated heating output under warmer climate conditions for medium-temperature applications (P rated)	kW	34
Rated heating output under warmer climate conditions for low-temperature applications (P rated)	kW	38
Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (η s)	%	139
Seasonal space heating energy efficiency under colder climate conditions for low-temperature applications ($\mbox{$\mbox{$$}$}(\mbox{$\mbox{$$}$})$	%	208
Seasonal space heating energy efficiency under warmer climate conditions for medium-temperature applications (η s)	%	132
Seasonal space heating energy efficiency under warmer climate conditions for low-temperature applications ($\mbox{$\mbox{$$}$}$ s)	%	199
Annual energy consumption under colder climate conditions for medium-temperature applications (QHE)	kWh/a	28986
Annual energy consumption under colder climate conditions for low-temperature applications (QHE)	kWh/a	21594
Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE)	kWh/a	13033
Annual energy consumption under warmer climate conditions for low-temperature applications (QHE)	kWh/a	9834
Sound power level, outdoor	dB(A)	60

With auxiliary heater		3016
Combination heater with heat pump		
Rated heating output under colder climate conditions for medium-	kW	43
temperature applications (P rated)	RVV	
Rated heating output under average climate conditions for medium- temperature applications (P rated)	kW	34
Rated heating output under warmer climate conditions for medium- temperature applications (P rated)	kW	34
Tj = -7 °C heating output, partial load range under colder climate conditions (Pdh)	kW	35,8
Tj = -7 °C heating output, partial load range under average climate conditions (Pdh)	kW	34,5
Tj = 2 °C heating output, partial load range under colder climate conditions (Pdh)	kW	36,7
Tj = 2 °C heating output, partial load range under average climate conditions (Pdh)	kW	35,8
Tj = 2 °C heating output, partial load range under warmer climate conditions (Pdh)	kW	34,1
Tj = 7 °C heating output, partial load range under colder climate conditions (Pdh)	kW	37,4
Tj = 7 °C heating output, partial load range under average climate conditions (Pdh)	kW	36,7
Tj = 7 °C heating output, partial load range under warmer climate conditions (Pdh)	kW	35,2
Tj = 12 °C heating output, partial load range under colder climate conditions (Pdh)	kW	37,9
Tj = 12 °C heating output, partial load range under average climate conditions (Pdh)	kW	37,5
Tj = 12 °C heating output, partial load range under warmer climate conditions (Pdh)	kW	37,0
Tj = dual mode temperature under colder climate conditions (Pdh)	kW	35,3
Tj = dual mode temperature under average climate conditions (Pdh)	kW	34,1
Tj = dual mode temperature under warmer climate conditions (Pdh)	kW	34,1
Tj = operating temperature limit under colder climate conditions (Pdh)	kW	34,1
Tj = operating temperature limit under average climate conditions (Pdh)	kW	34,1
Tj = operating temperature limit under warmer climate conditions (Pdh)	kW	34,1
For air source heat pumps: Tj = -15 °C (if TOL< -20 °C) (Pdh)	kW	34,1
Dual mode temperature under colder climate conditions (Tbiv)	°C	-15
Dual mode temperature under average climate conditions (Tbiv)	°C	-10
Dual mode temperature under warmer climate conditions (Tbiv)	°C	2
Seasonal space heating energy efficiency under colder climate conditions for medium-temperature applications (ηs)	%	139
Seasonal space heating energy efficiency under average climate conditions for medium-temperature applications (Ŋs)	%	133
Seasonal space heating energy efficiency under warmer climate conditions for medium-temperature applications (η s)	%	132
Tj = -7 °C COP, partial load range under colder climate conditions (COPd)		3,48
Tj = -7 °C COP, partial load range under average climate conditions (COPd)		2,95
Tj = 2 °C COP, partial load range under colder climate conditions (COPd)		3,91
Tj = 2 °C COP, partial load range under average climate conditions (COPd)		3,50
Tj = 2 °C COP, partial load range under warmer climate conditions (COPd)		2,82
Tj = 7 °C COP, partial load range under colder climate conditions (COPd)		4,32
Tj = 7 °C COP, partial load range under average climate conditions (COPd)		3,91
Tj = 7 °C COP, partial load range under warmer climate conditions (COPd)	_	3,24

Ti = 12 °C COP, partial load range under warmer climate conditions (COPd) Ti = dual mode temperature under colder climate conditions (COPd) Ti = dual mode temperature under average climate conditions (COPd) Ti = dual mode temperature under average climate conditions (COPd) Ti = dual mode temperature under average climate conditions (COPd) Ti = operating temperature limit under colder climate conditions (COPd) Ti = operating temperature limit under average climate conditions (COPd) Ti = operating temperature limit under average climate conditions (COPd) Ti = operating temperature limit under average climate conditions (COPd) To = operating temperature limit under warmer climate conditions (COPd) For air source heat pumps: Tj = -15 °C (if TOL< -20 °C) (COPd) Operating temperature limit of heating water under average climate conditions (WTOL) Power consumption, off-mode (Poff) W Operating temperature limit of heating water under average climate conditions (WTOL) Power consumption, thermostat off-mode (PTO) W To Power consumption, thermostat off-mode (PTO) W To Power consumption, standby state (PSB) W To Power consumption, standby state (PSB) W To Power consumption, operating state, with crankcase heating (PCK) Rated heating output of auxiliary heater under average climate conditions (PSUP) Type of energy supply, auxiliary heater Output control Sound power level, outdoor Annual energy consumption under colder climate conditions for medium-temperature applications (OHE) Annual energy consumption under average climate conditions for medium-temperature applications (OHE) Annual energy consumption under average climate conditions for medium-temperature applications (OHE) Annual energy consumption under average climate conditions for medium-temperature applications (OHE)	$T_{\rm J} = 12$ °C COP, partial load range under colder climate conditions (COPd)		4,66
COPd 3,25	,		442,00
Tj = dual mode temperature under average climate conditions (COPd) Tj = dual mode temperature under warmer climate conditions (COPd) Tj = dual mode temperature limit under colder climate conditions (COPd) Tj = operating temperature limit under average climate conditions (COPd) Tj = operating temperature limit under average climate conditions (COPd) Tj = operating temperature limit under warmer climate conditions (COPd) Tj = operating temperature limit under warmer climate conditions (COPd) For air source heat pumps: Tj = -15 °C (if TOL< -20 °C) (COPd) Operating temperature limit of heating water under average climate conditions (WTOL) Power consumption, off-mode (Poff) W Operating temperature limit of heating water under average climate conditions (WTOL) Power consumption, off-mode (Poff) W To Power consumption, off-mode (Poff) W To Power consumption, standby state (PSB) W To Power consumption, operating state, with crankcase heating (PCK) W To Power consumption operating state, with crankcase heating (PCK) W To Power consumption operating state, with crankcase heating (PCK) W To Power consumption operating state, with crankcase heating (PCK) W To Power consumption operating state, with crankcase heating (PCK) W To Power consumption operating state, with crankcase heating (PCK) W To Power consumption operating state, with crankcase heating (PCK) W To Power consumption operating state, with crankcase heating (PCK) W To Bound power level, outdoor Bound power level, outdoor Bound power level, outdoor Bound power level, outdoor Bound power level, indoor Bound power level, indoor Bound power level, indoor Bound power level, outdoor Bound power	,		4,08
Tj = dual mode temperature under warmer climate conditions (COPd) 2,82 Tj = operating temperature limit under colder climate conditions (COPd) 2,82 Tj = operating temperature limit under average climate conditions (COPd) 2,82 Tj = operating temperature limit under average climate conditions (COPd) 2,82 For air source heat pumps: Tj = -15 °C (if TOL < -20 °C) (COPd) 2,82 Operating temperature limit of heating water under average climate conditions (WTOL) Power consumption, off-mode (Poff) Power consumption, thermostat off-mode (PTO) Power consumption, standby state (PSB) Power consumption, operating state, with crankcase heating (PCK) Rated heating output of auxiliary heater under average climate conditions (PSUP) Type of energy supply, auxiliary heater Output control Sound power level, outdoor Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for	Tj = dual mode temperature under colder climate conditions (COPd)		3,25
Tj = operating temperature limit under colder climate conditions (COPd) Tj = operating temperature limit under average climate conditions (COPd) Tj = operating temperature limit under warmer climate conditions (COPd) For air source heat pumps: Tj = -15 °C (if TOL< -20 °C) (COPd) Operating temperature limit of heating water under average climate conditions (WTOL) Power consumption, off-mode (Poff) Power consumption, thermostat off-mode (PTO) Power consumption, standby state (PSB) Power consumption, operating state, with crankcase heating (PCK) Rated heating output of auxiliary heater under average climate conditions (PSUP) Type of energy supply, auxiliary heater Output control Sound power level, outdoor Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for well-material average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for well-material average climate conditions	Tj = dual mode temperature under average climate conditions (COPd)		2,82
Tj = operating temperature limit under average climate conditions (COPd) Tj = operating temperature limit under warmer climate conditions (COPd) Tj = operating temperature limit under warmer climate conditions (COPd) Operating source heat pumps: Tj = -15 °C (if TOL< -20 °C) (COPd) Operating temperature limit of heating water under average climate conditions (WTOL) Power consumption, off-mode (Poff) Power consumption, thermostat off-mode (PTO) Power consumption, standby state (PSB) Power consumption, operating state, with crankcase heating (PCK) Rated heating output of auxiliary heater under average climate conditions (PSUP) Type of energy supply, auxiliary heater under average climate Output control Sound power level, outdoor Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (OHE) Annual energy consumption under average climate conditions for medium-temperature applications (OHE) Annual energy consumption under average climate conditions for medium-temperature applications (OHE) Annual energy consumption under average climate conditions for medium-temperature applications (OHE) Annual energy consumption under average climate conditions for while a supplications (OHE) Annual energy consumption under average climate conditions for well and the conditions for while a supplications (OHE) Annual energy consumption under warmer climate conditions for while a supplication (OHE)	Tj = dual mode temperature under warmer climate conditions (COPd)		2,82
Tj = operating temperature limit under warmer climate conditions (COPd) For air source heat pumps: Tj = -15 °C (if TOL< -20 °C) (COPd) Operating temperature limit of heating water under average climate conditions (WTOL) Power consumption, off-mode (Poff) Power consumption, thermostat off-mode (PTO) Power consumption, standby state (PSB) Power consumption, operating state, with crankcase heating (PCK) Rated heating output of auxiliary heater under average climate conditions (PSUP) Type of energy supply, auxiliary heater Output control Sound power level, outdoor Sound power level, outdoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for well-meaning to the properature applications (QHE) Annual energy consumption under warmer climate conditions for well-meaning temperature applications (QHE) Annual energy consumption under warmer climate conditions for well-meaning temperature applications (QHE) Annual energy consumption under warmer climate conditions for well-meaning temperature applications (QHE) Annual energy consumption under warmer climate conditions for well-meaning temperature applications (QHE)	Tj = operating temperature limit under colder climate conditions (COPd)		2,82
For air source heat pumps: Tj = -15 °C (if TOL< -20 °C) (COPd) Querating temperature limit of heating water under average climate conditions (WTOL) Power consumption, off-mode (Poff) Power consumption, thermostat off-mode (PTO) Power consumption, standby state (PSB) Power consumption, operating state, with crankcase heating (PCK) Rated heating output of auxiliary heater under average climate conditions (PSUP) Type of energy supply, auxiliary heater Output control Sound power level, outdoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for	, , , , , , , , , , , , , , , , , , , ,		2,82
Operating temperature limit of heating water under average climate conditions (WTOL) Power consumption, off-mode (Poff) Power consumption, thermostat off-mode (PTO) Power consumption, standby state (PSB) Power consumption, operating state, with crankcase heating (PCK) Rated heating output of auxiliary heater under average climate conditions (PSUP) Type of energy supply, auxiliary heater Output control Sound power level, outdoor Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for kWh/a Annual energy consumption under warmer climate conditions for kWh/a Annual energy consumption under warmer climate conditions for kWh/a Annual energy consumption under warmer climate conditions for kWh/a	, , , , , , , , , , , , , , , , , , , ,		2,82
conditions (WTOL) Power consumption, off-mode (Poff) Power consumption, thermostat off-mode (PTO) Power consumption, standby state (PSB) Power consumption, operating state, with crankcase heating (PCK) Rated heating output of auxiliary heater under average climate conditions (PSUP) Type of energy supply, auxiliary heater Output control Sound power level, outdoor Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for Methods **Wh/a** **Wh/a** **Initiation of the conditions for Methods **Initiat	For air source heat pumps: Tj = -15 °C (if TOL $<$ -20 °C) (COPd)		2,82
Power consumption, thermostat off-mode (PTO) Power consumption, standby state (PSB) Power consumption, operating state, with crankcase heating (PCK) Rated heating output of auxiliary heater under average climate conditions (PSUP) Type of energy supply, auxiliary heater Output control Sound power level, outdoor Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for kWh/a Annual energy consumption under warmer climate conditions for kWh/a Annual energy consumption under warmer climate conditions for kWh/a		°C	60
Power consumption, standby state (PSB) Power consumption, operating state, with crankcase heating (PCK) Rated heating output of auxiliary heater under average climate conditions (PSUP) Type of energy supply, auxiliary heater Output control Sound power level, outdoor Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for which was a condition of the conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for which was a condition of the	Power consumption, off-mode (Poff)	W	0
Power consumption, operating state, with crankcase heating (PCK) Rated heating output of auxiliary heater under average climate conditions (PSUP) Type of energy supply, auxiliary heater Output control Sound power level, outdoor Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for kWh/a Annual energy consumption under warmer climate conditions for kWh/a Annual energy consumption under warmer climate conditions for kWh/a Annual energy consumption under warmer climate conditions for kWh/a	Power consumption, thermostat off-mode (PTO)	W	7
Rated heating output of auxiliary heater under average climate conditions (PSUP) Type of energy supply, auxiliary heater Output control Sound power level, outdoor Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for kWh/a 13033	Power consumption, standby state (PSB)	W	7
conditions (PSUP) Type of energy supply, auxiliary heater Output control Sound power level, outdoor Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for kWh/a 13033	Power consumption, operating state, with crankcase heating (PCK)	W	74
Output control Sound power level, outdoor Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for kWh/a 13033		kW	0,0
Sound power level, outdoor Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for kWh/a 13033	Type of energy supply, auxiliary heater		elektrisch
Sound power level, indoor Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for kWh/a	Output control		fest
Annual energy consumption under colder climate conditions for medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for kWh/a 13033	Sound power level, outdoor	dB(A)	60
medium-temperature applications (QHE) Annual energy consumption under average climate conditions for medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for kWh/a 13033	Sound power level, indoor	dB(A)	60
medium-temperature applications (QHE) Annual energy consumption under warmer climate conditions for kWh/a 13033	3, 1	kWh/a	28986
XWN/A 13033	3, 1	kWh/a	20029
mediani temperature appreciations (QTL)	Annual energy consumption under warmer climate conditions for medium-temperature applications (QHE)	kWh/a	13033
Flow rate on heat source side m³/h 88	Flow rate on heat source side	m³/h	88
